Hi Jess:

I did manage to talk to April Lake and received a copy of the presentation. She was not able to point me to specific EPA reviews (e.g., CARC review of sulfoxaflo I was able to find) that are more informative on what EPA considers the best approach to investigate and communicate the MOAs. It is difficult to search the EPA website and find review documents, since they seem to be stored as pdfs in dockets or other folders that are not searchable. Regardless, the information in the presentation is informative and helped in our drafting of the MON 102100 mouse liver tumor MOA white paper.

Best regards,

Jim

Subject: SOT Poster Request

Hi Jess:

I'm working on putting together the MON 102100 mouse liver tumor MOA white paper we discussed during our June 12th meeting. We are planning to submit the registration package next month. While searching for some examples that could improve the format of our MOA white paper, I came across your poster abstract from the SOT annual meeting this year (Mode of Action Profiles for Pesticide Compounds with Rodent Liver Tumor Outcomes). Would it be possible for you to send me a copy of the poster? Besides just wanting to look at the full poster, I am hopeful that you provided the names of some of the chemicals. That way, I could search for the CARC reviews in the dockets to get more specifics, particularly with reference to the human relevance framework.

Any help would be appreciated.

Best regards,

Jim
